Plastic Surgery Center Professional Laser Treatments

ProFractional Treatment ***$1400 / single*** ***$3500 / series of 3***

ProFractional is a quick and comfortable laser procedure with little or no downtime, used for improving the overall appearance of your skin. ProFractional uses a laser microbeam to treat thousands of pinpoint areas of your skin, and because only a fraction of the skin is directly treated with the laser, healing time is quick and downtime is short. It can be used to improve a wide variety of skin conditions, but is used most for: wrinkles and fine lines, post-traumatic scars, acne scars, age spots, sun spots, freckles, aging and sun-damaged skin. If you are looking for younger looking skin with a fast recovery, then you may be an ideal candidate.

Microlaser Peel (Erbium) ***$800 / single***

Microlaser Peel (Erbium) treats skin conditions associated with aging, acne scarring, and active lifestyles. Microlaser Peel is the ideal treatment for those patients that want improved skin with immediate lasting results, little time off, little discomfort, and post – treatment care.

ProFractional and MicroLaserPeel ***$2000 / single*** ***$5500 / series of 3***

ProFractional can be combined with a MicroLaser Peel for complete results after just one treatment. Receive the benefits of fractional dermal rejuvenation coupled with 100% treatment of the epidermis to remove the visible signs of sun damage and aging.

SkinTyte ***$600 / each*** ***$3000 series of 6***

Non-surgical lift recommended for mildly sagging skin on the face and body. This treatment selectively targets and treats dermal collagen, resulting in partial coagulation and contraction of collagen. Skintyte thermally heats skin tissue without any surface damage to improve wrinkles, scars and skin texture. One to six treatments recommended.

BBL Broad Band Light Photo Facial Treatments

Broad Band Light is a clinically proven technology used to reverse the signs of chronic sun damage including sun spots, age spots and uneven skin tone. It can also effectively treat small vessels in the face and improve the appearance of rosacea.

Area	Single	Series of 3	Series of 6

Laser Hair Removal ***Call or review website for pricing***

We use 1064 Nd YAG Lasers that selectively targets hair follicles and heats them with infrared energy. Our state of the art lasers treat many hairs at once, making treatments of larger areas more efficient. Treatment is relatively comfortable and all skin types can be treated with this infrared technology.

Laser Vein Therapy ***30 min / $300*** ***45 min / $400*** ***60 min / $600***

Laser therapy is extremely safe and effective for treating spider leg veins, as well as veins that are visible on the face, neck, chest, and just about anywhere else. The number of treatments necessary to resolve vein concerns depends largely on the size of the vessel and the body's ability to heal.
