

► Bruce E. Burnham, MD

This “Top Plastic Surgeon” (Consumers Research Council 2007) has honed his skills for over 30 years, producing results that are beautiful, natural and “personal.” Adding to his vast experience, Dr. Burnham constantly explores new advances in cosmetic surgery and incorporates the safest, most effective methods into his repertoire. He will take the time to understand your needs, expectations, self-image and lifestyle before suggesting the best options to achieve your goals - from breast augmentation to body contouring to collagen injections. **The Plastic Surgery Center, Inc.** (created by Dr. Burnham in 1981) offers a friendly, knowledgeable staff committed to your comfort from the initial visit through post-surgical follow-ups - questions and callbacks are encouraged! Dr. Burnham has studied a variety of factors affecting recovery and has developed a list of foods and drugs to avoid prior to surgery. By following this pre-surgery diet, bruising and swelling are minimized and healing time is often reduced by half. The Center’s skin care facility features state-of-the-art lasers for hair removal and vein reduction, plus acne treatments, Botox and injectable fillers. In addition to his conveniently located, JCAHO-accredited outpatient facility- just minutes from several major highways and easily accessible from both Greater Hartford and New Haven - Dr. Burnham is affiliated with the best hospitals in Connecticut.
